

Pretoria 6th of June 2014

To Whom it may Concern,

ECAT is a well-established organization operating in the online development spectrum and we have been in existence for the last 10 years. We are currently dealing with over 80 clients in the building industry and are supporting many charity organization eg. (Oliver's house, Save the Children, etc.)

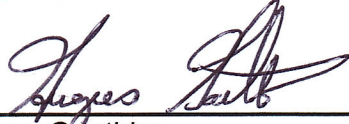

Tilulu mission and objectives is in-line with what ECAT wants to achieve in terms of sponsorship. We believe that the future of this country lies with the children and that Tilulu will help in this regard.

I've personally known Ray for many years through my dealing with my clients and this is how we became friends. Ray is a caring intellectual, very artistic, who is a highly motivated individual with unlimited passion for what she believes in. Her values are pure and her interest is the good of the people she cares about.

She has surmounted obstacles in her past where almost everyone else would've failed. With her difficult life experience, Ray has the knowledge & endurance, and with sufficient moral & financial support, we believe that she will be able to help hundreds of women & children and give them hope of a better future.

Raylene has been a source of inspiration to us all @ ECAT and we're proud to be associated with her venture. We've committed ourselves to assist Tilulu in terms of online development and to also offer sound business advice when required. A monthly donation to Tilulu also forms part of our participation in supporting these type of projects.

We wish her all the best in her future endeavours.
